

I purchased a satellite radio for the sole reason that commercial broadcasters were not providing a product that I wished to listen to. XM radio service does, however provide a product that I am willing to pay for. I pay for this service, and I am appalled that the FCC would even consider petition 04-160. Commercial broadcasters should realise that they need to provide a service that people want, not what they feel like providing. If the commercial stations provided the quality of service that XM did then possibly they would not be in the position that they are in, as long as they broadcast nothing but garbage, I for one will continue to listen to the fine quality entertainment that XM provides.
